The Fastest, Easiest and Risk-Free Way to Multiply your Tronaxe - TX “Infinately”

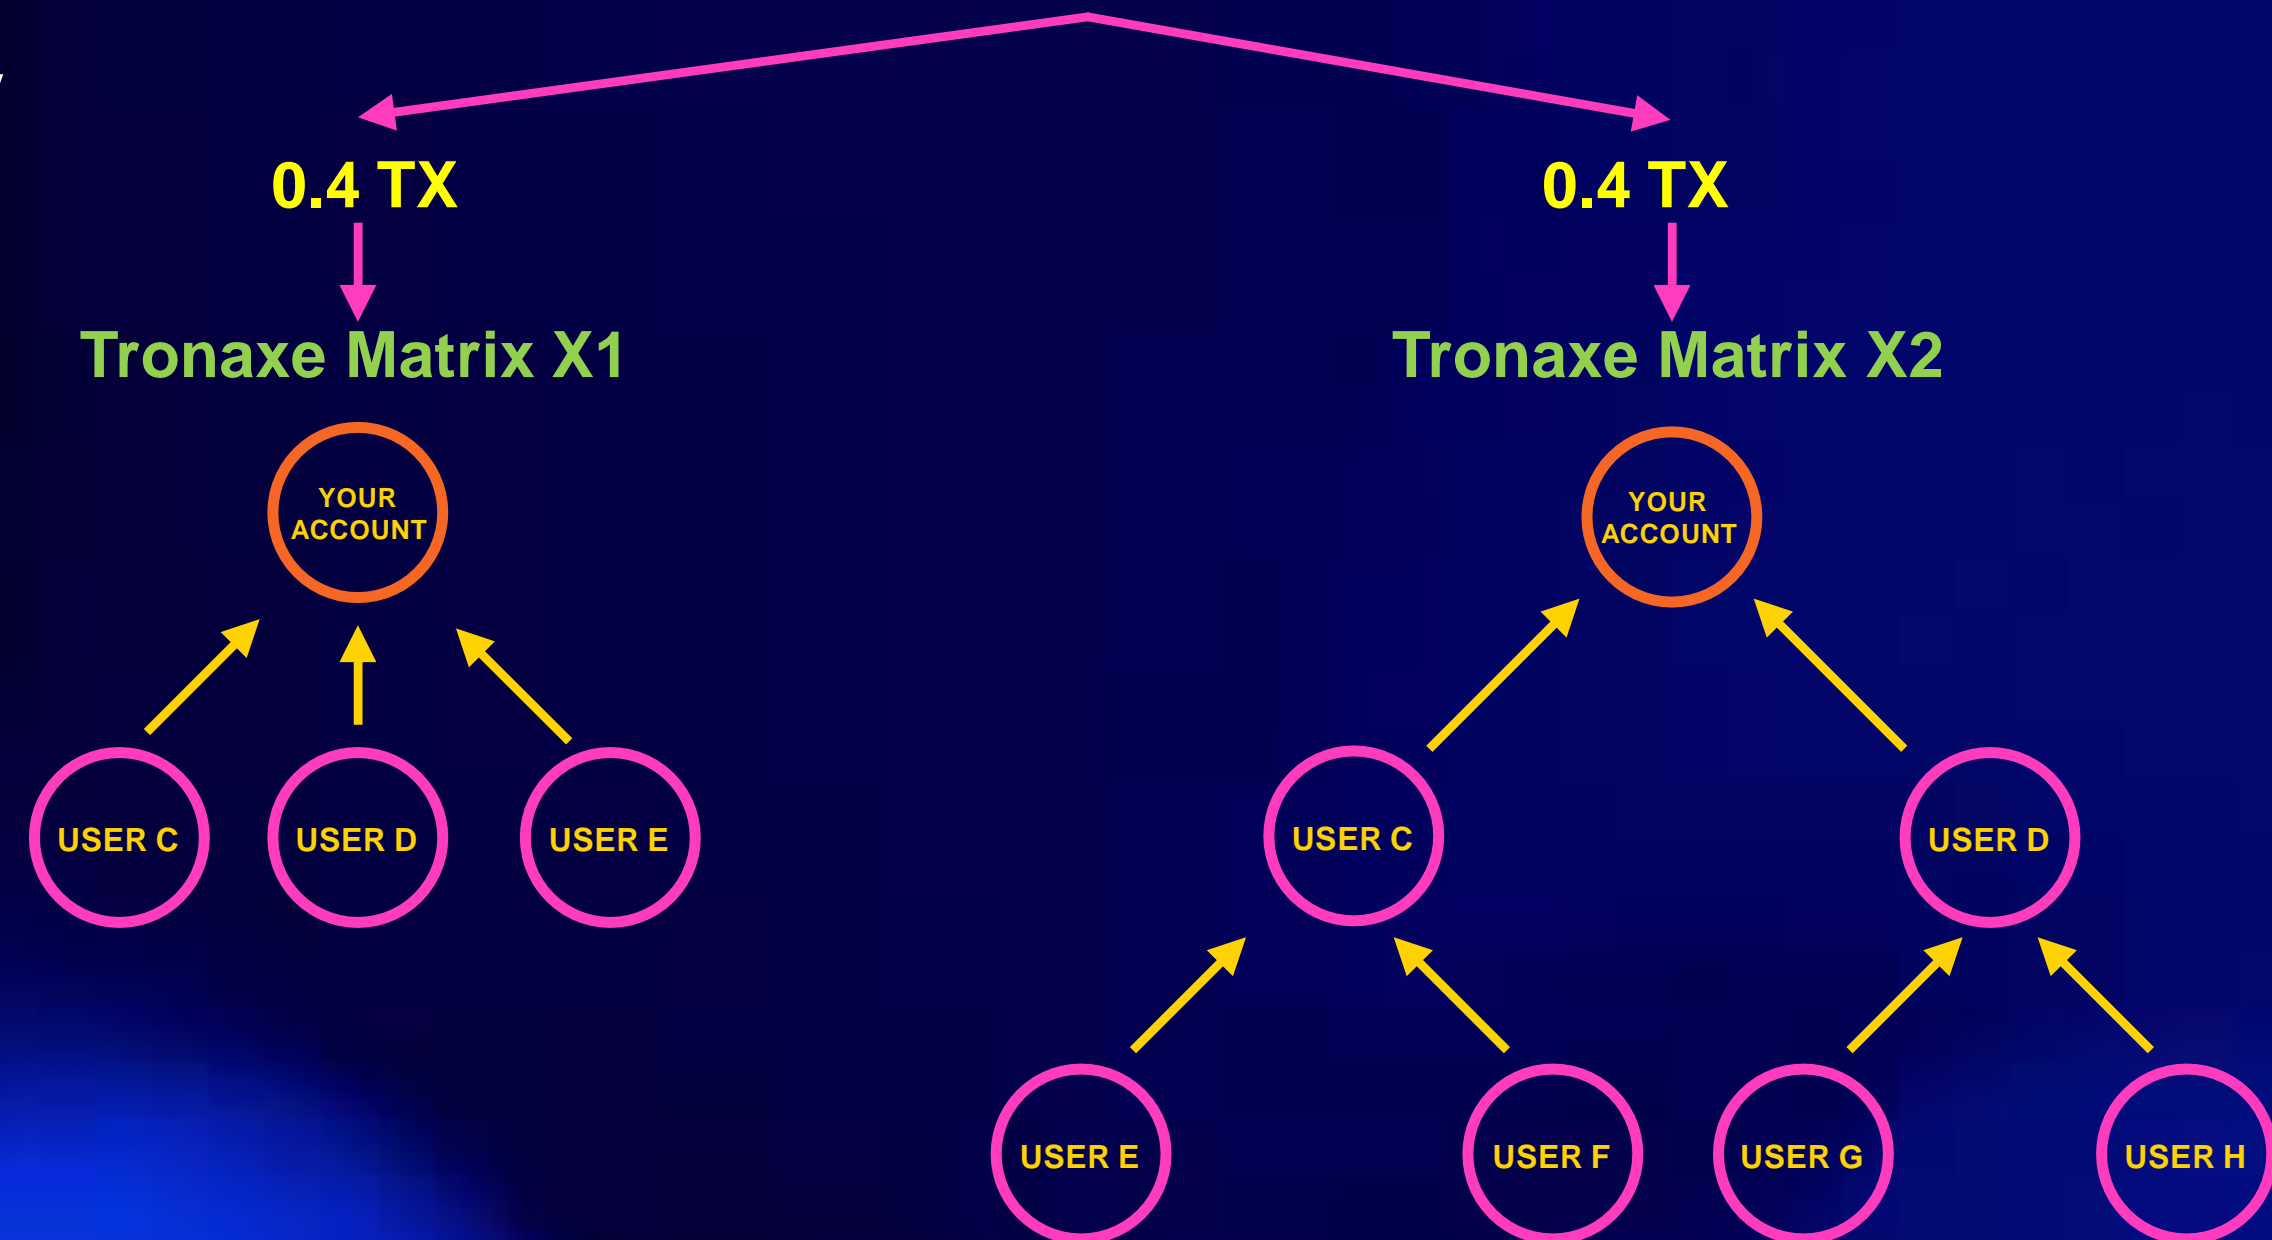

From the Team which brought you ETH Matrix Network comes the easiest way to multiply your TX.

- The only Matrix System which Pays out lifetime Income.
- 2 Matrix systems for double the earning potential.
- Low, low transaction cost on the Tronaxe Network.
- A first of it's kind for Tronaxe, make sure you are ready on launch day.
- 1 Tronaxe (TX) = 1 \$ (Buying Rate)
- 1 Tronaxe (TX) = 0.85 \$ (Selling Rate)

Tronaxe Matrix

There are 2 Matrix Systems within Tronaxe Matrix, you auto-join both when you first enter the system.

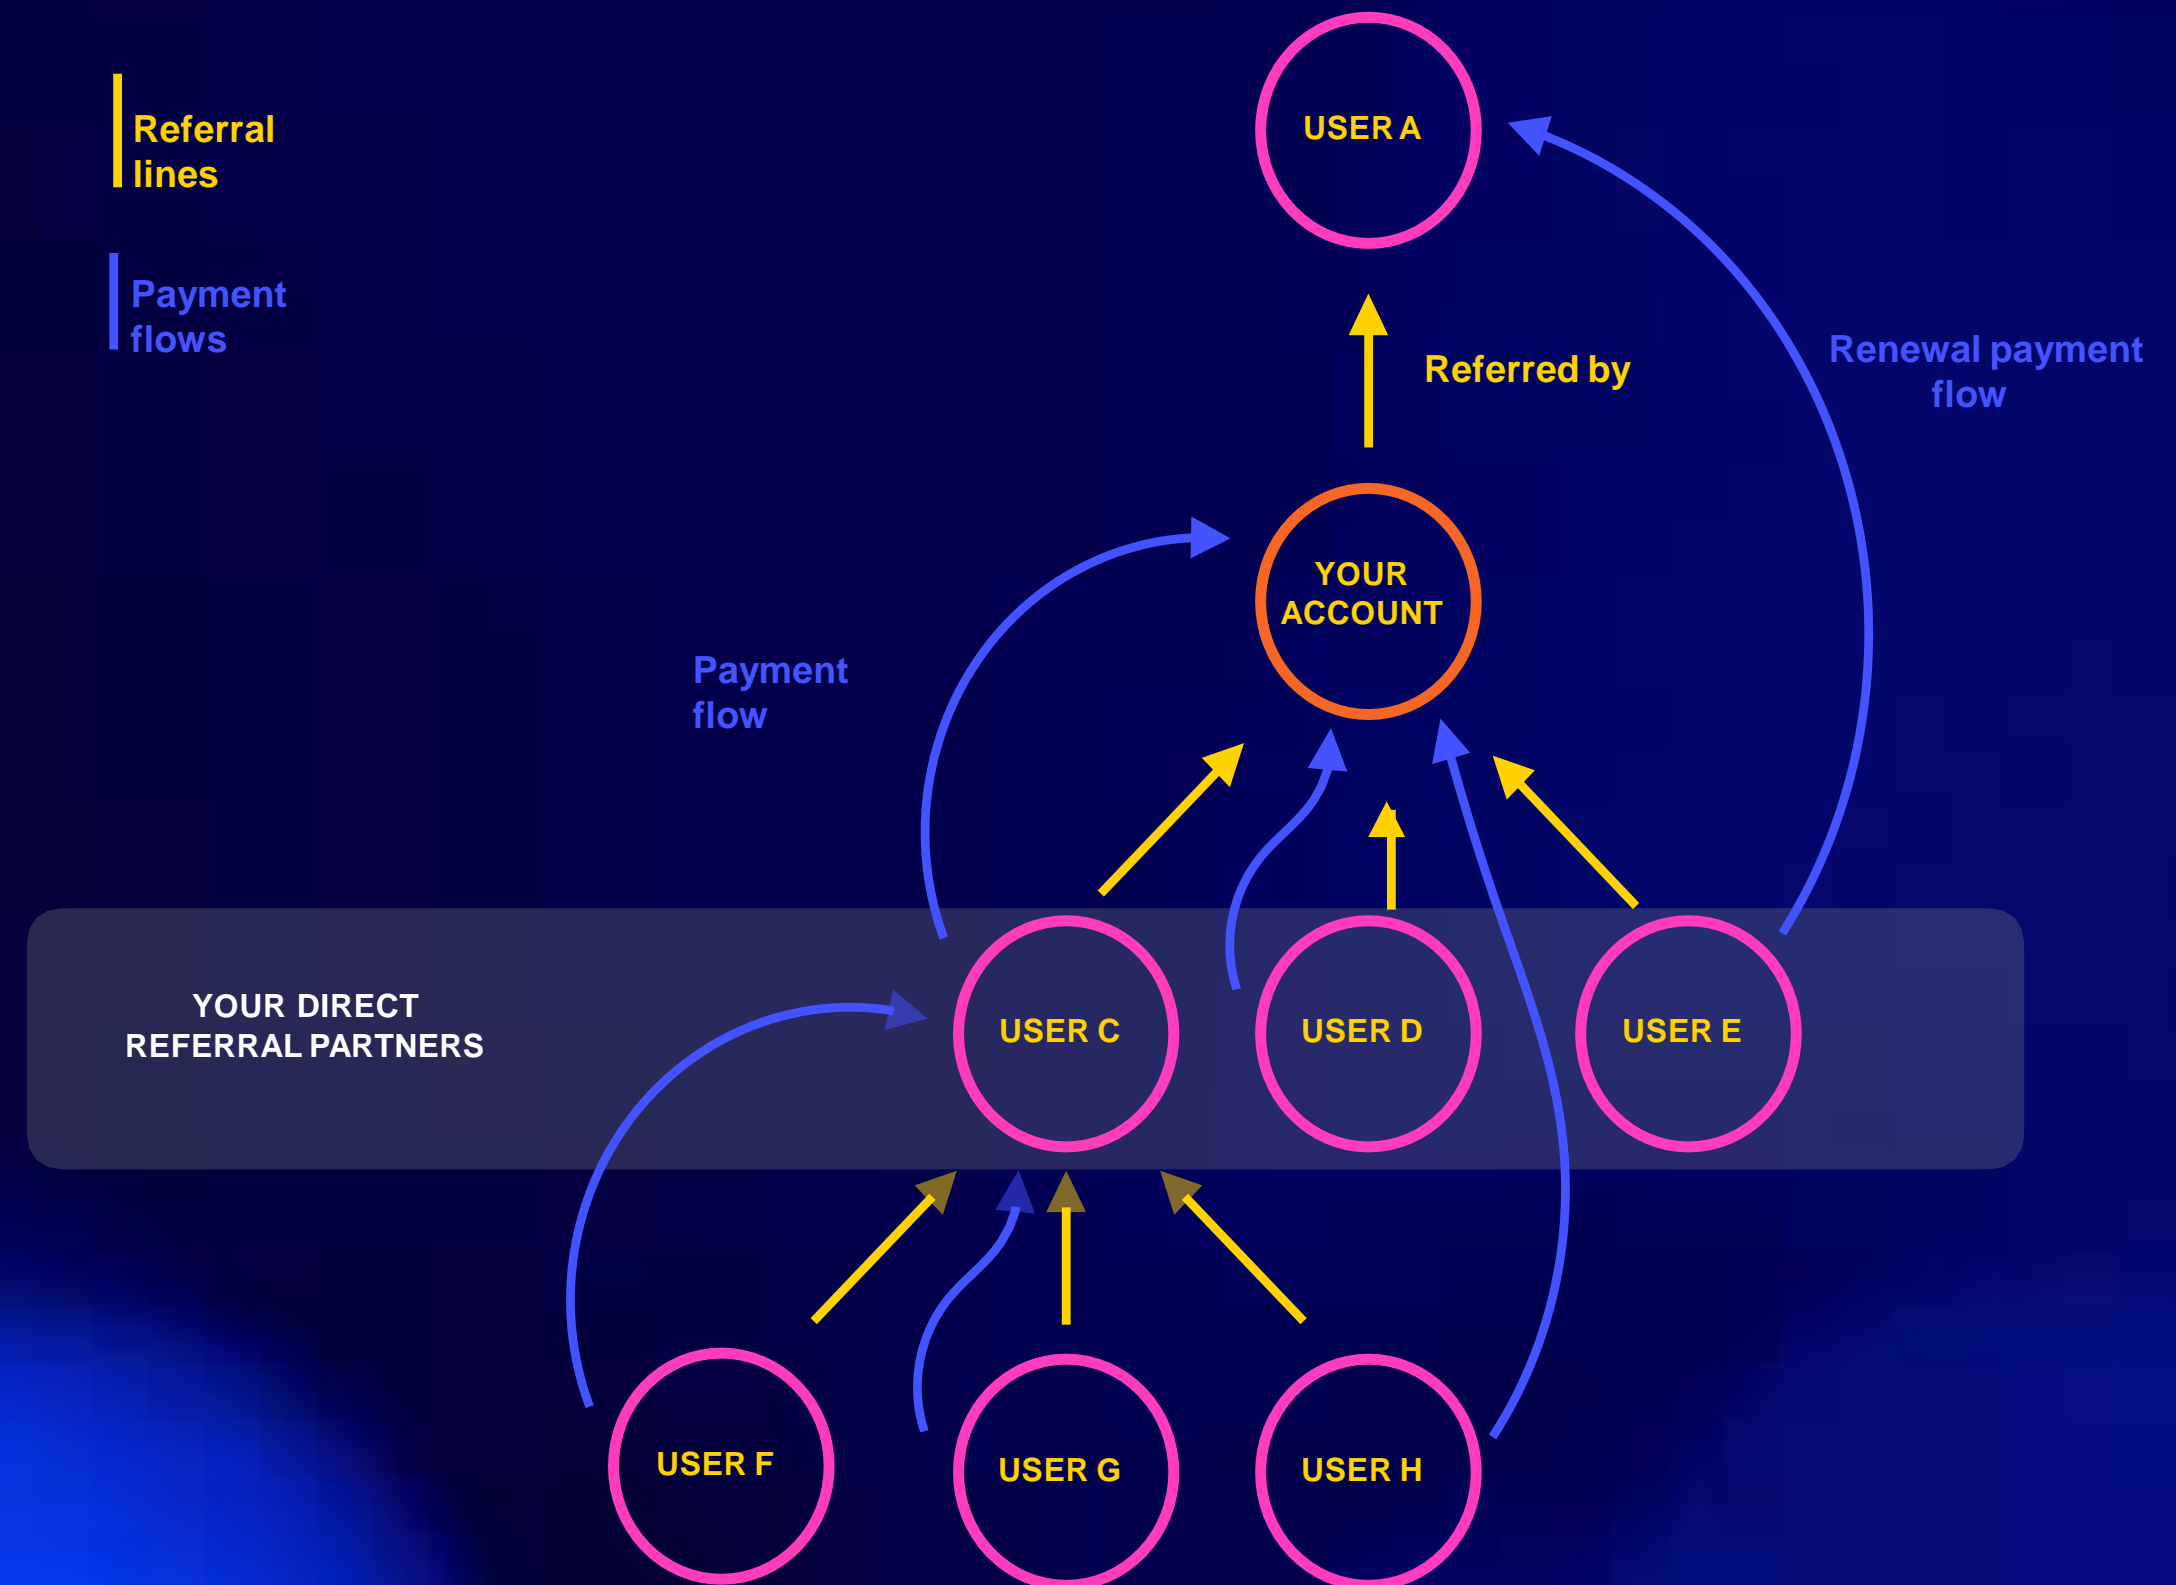

- ❖ The entry cost is 1 TX for first Matrix.
- ❖ Below each Matrix you have a number of partners which pay you TX direct into your wallet (P2P).
- ❖ Each Matrix has 20 Levels - each twice the price of the previous level, you buy into each level in sequence - with each one earning you double the money.
- ❖ There are no timeouts or expiry on any level!.
- ❖ Each level also have auto-renewal systems built in.
- ❖ Overflow payments and auto-referrals are baked right into Tronaxe Matrix.

Tronaxe Matrix X1

Tronaxe Matrix X1 - Level 1 Price = 0.5 TX

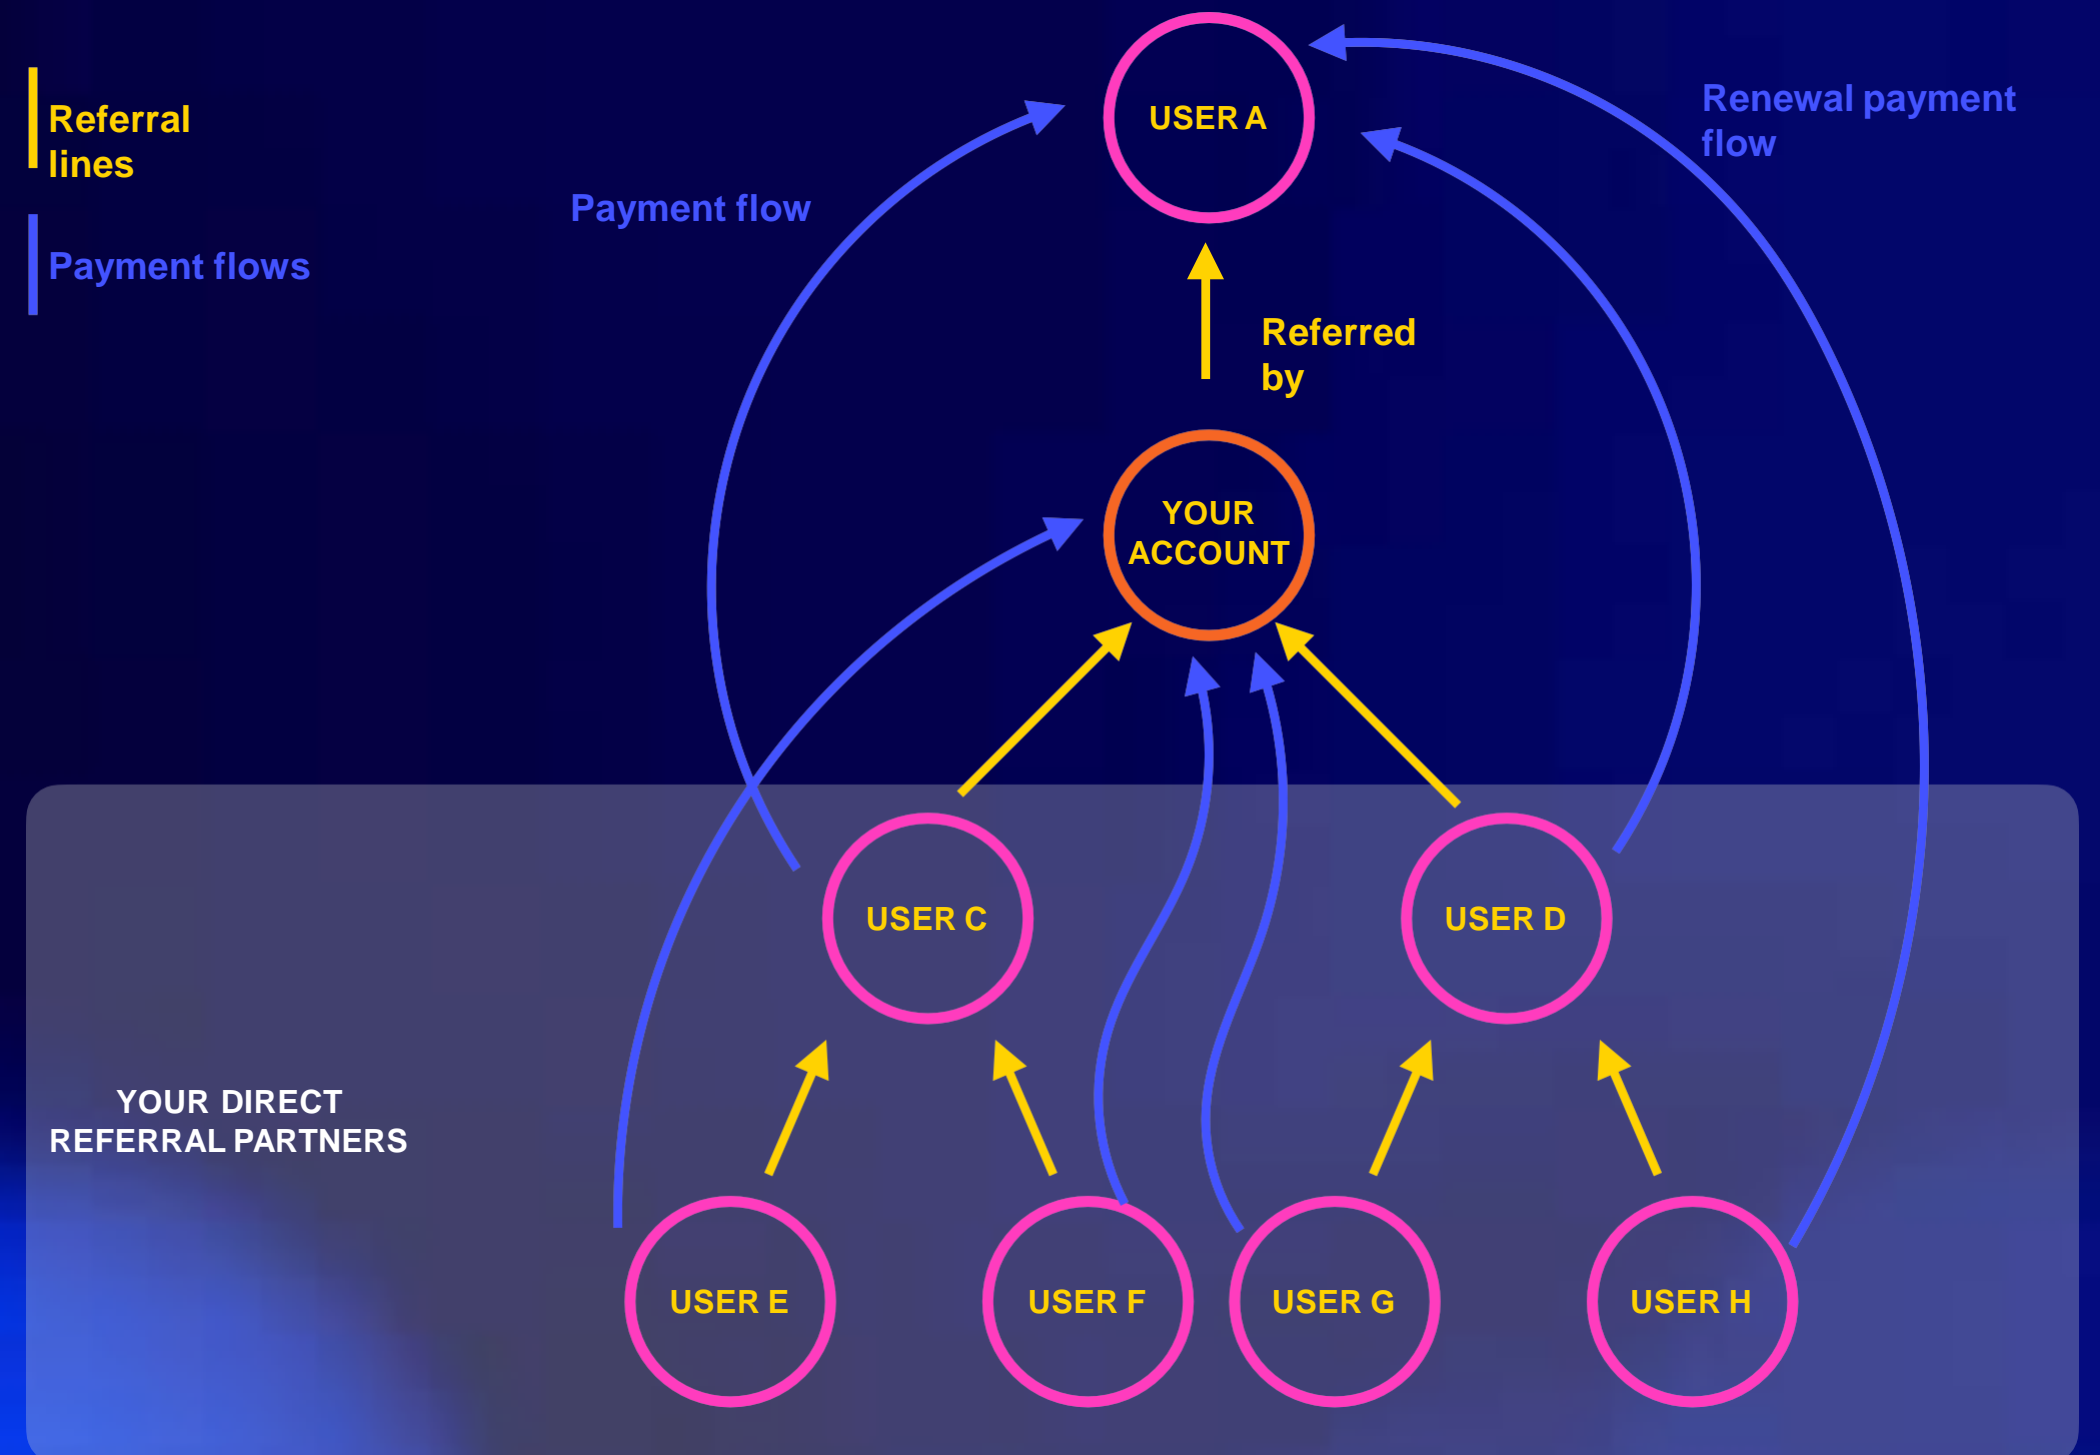

- ❖ Tronaxe Matrix X1 has 20 levels, each level is twice the price of the previous. Each level has 3 Partners below you (And you are in turn referred by another account)
- ❖ For your first 2 Partners below you - their payments into the Tronaxe Matrix go directly into your wallet.
- ❖ The 3rd partner that comes under your account at each level then auto reinvests for you. The payment comes to you but auto-pays for the level to be renewed by paying your upstream partner (At the same level).
- ❖ This renewal process resets your current partners connection (User C & D), at this point you should upgrade to the next level, if not the next round of payments at this level will be redirected to your upstream partners.
- ❖ You will also receive these “upstream/overflow” payments from your downstream partners too when they renew (See payment flow from User H).
- ❖ There are no expiry dates on partners or levels.

Tronaxe Matrix X2

Tronaxe Matrix X2 - Level 1 Price = 0.5 TX

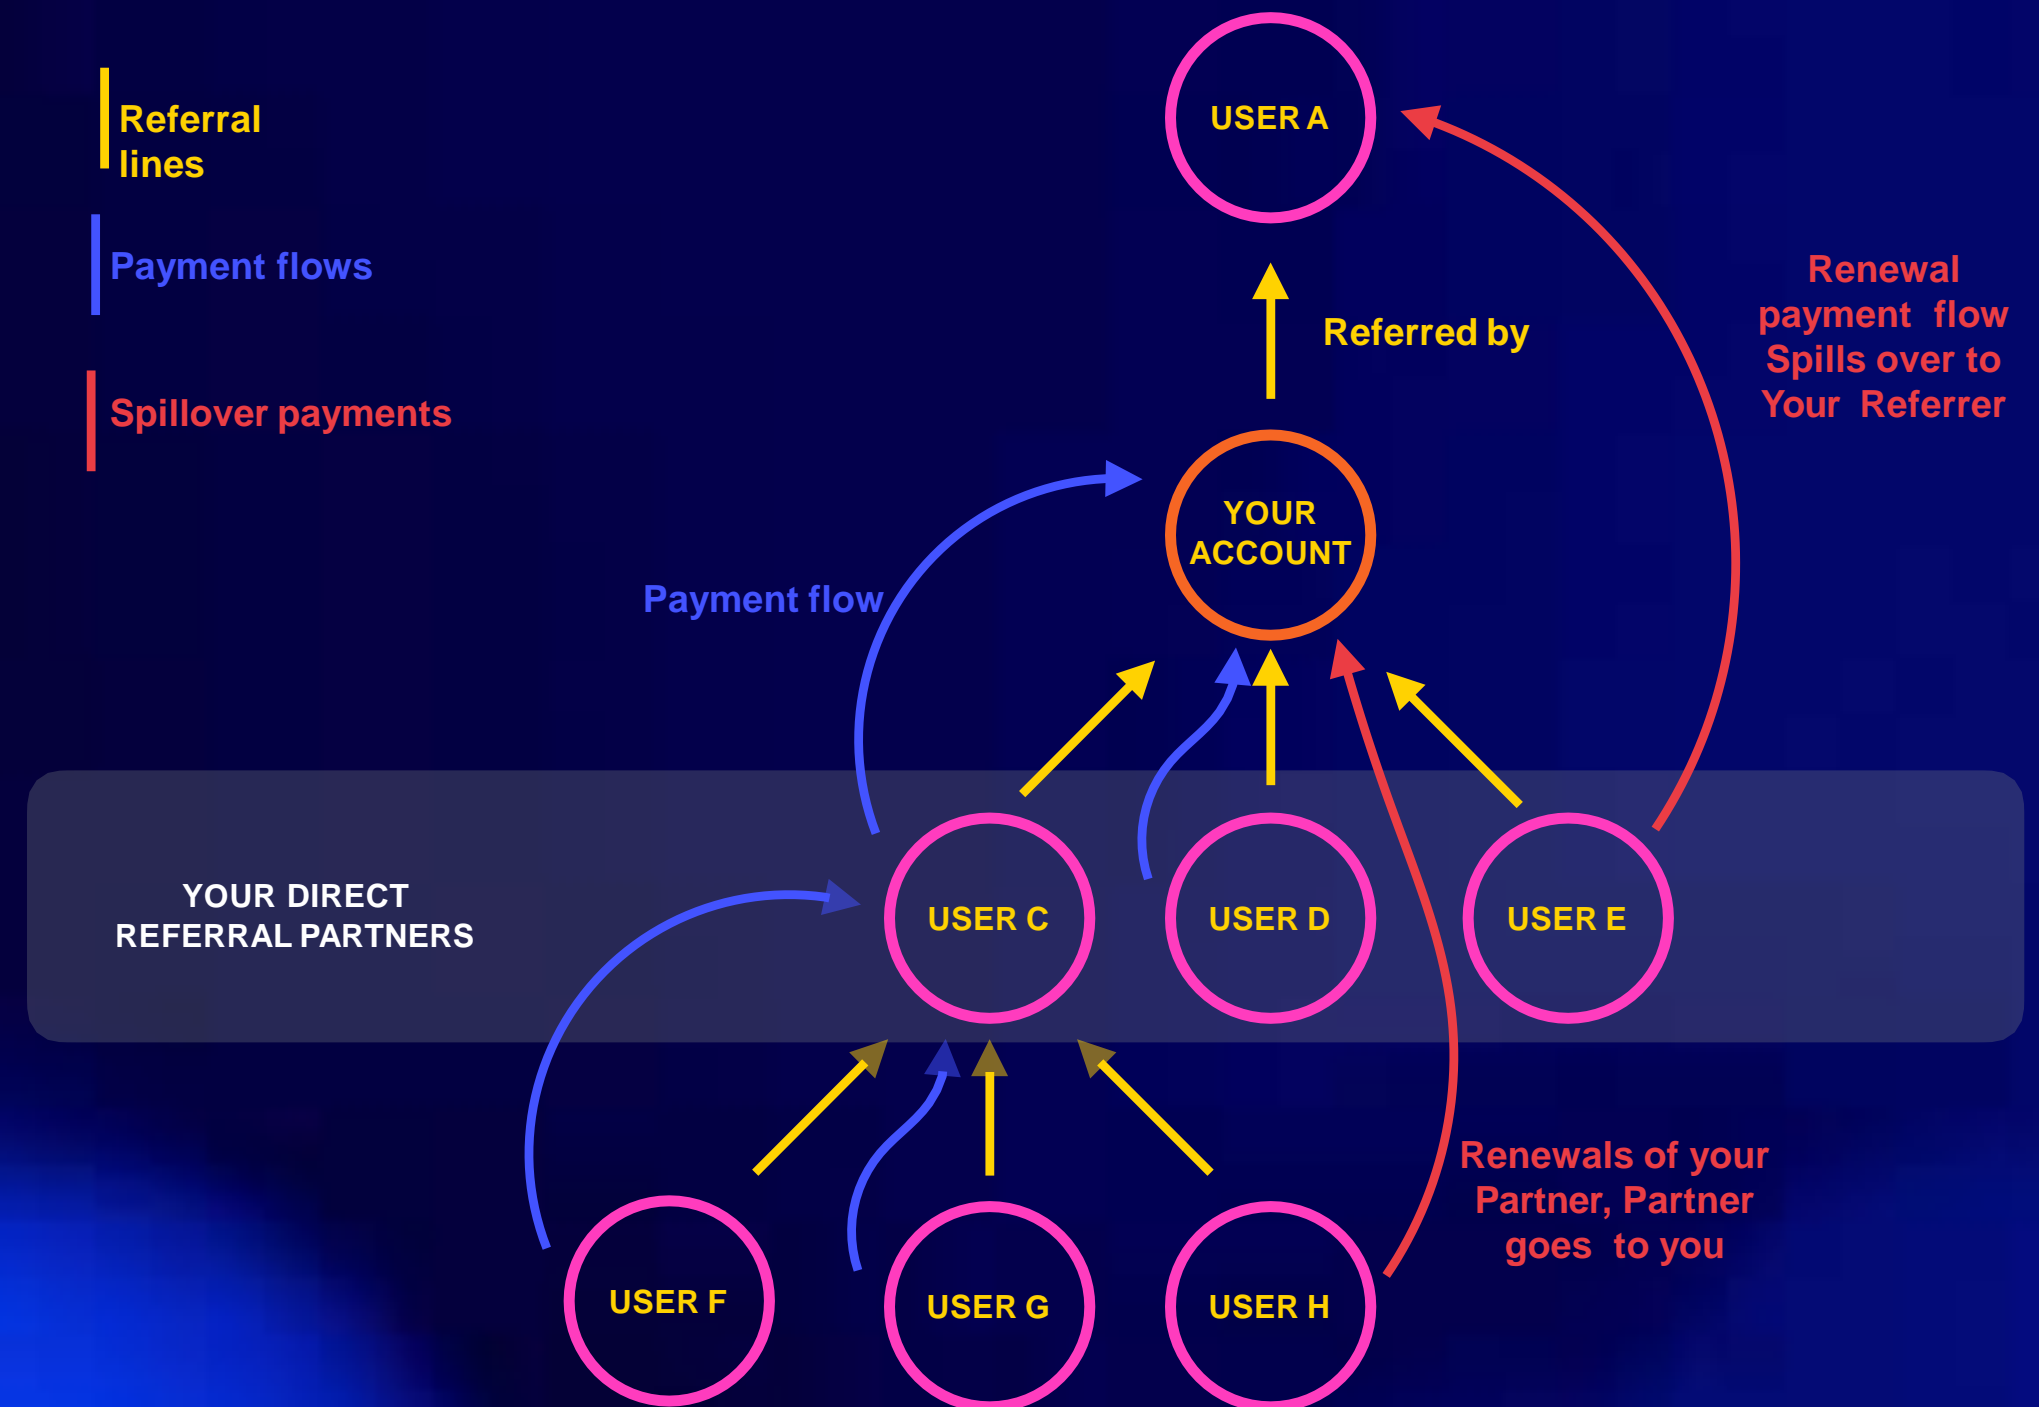

- ❖ Tronaxe Matrix X2 has 20 levels like X1, each level is almost twice the price of the previous. But unlike X1 this system is 2 levels deep for your referred partners - giving 6 partners in total.
- ❖ Your first 2 partners under X2 pay their payments direct to your current partner (User A).
- ❖ The second level (Users E, F, G & H) are your payment level with Users E, F, G paying direct TX direct into your wallet.
- ❖ User H is the auto-reinvest payment - renewing the level for you, as with the X1 system this clears your referrals letting the system begin again but only if you upgrade to the next level - otherwise the next round of payments from your partners would go up your matrix to your partner.
- ❖ Levels don't expire so filling your slots is not an issue.

Level Renewal Spillovers

Level Renewal Spillovers

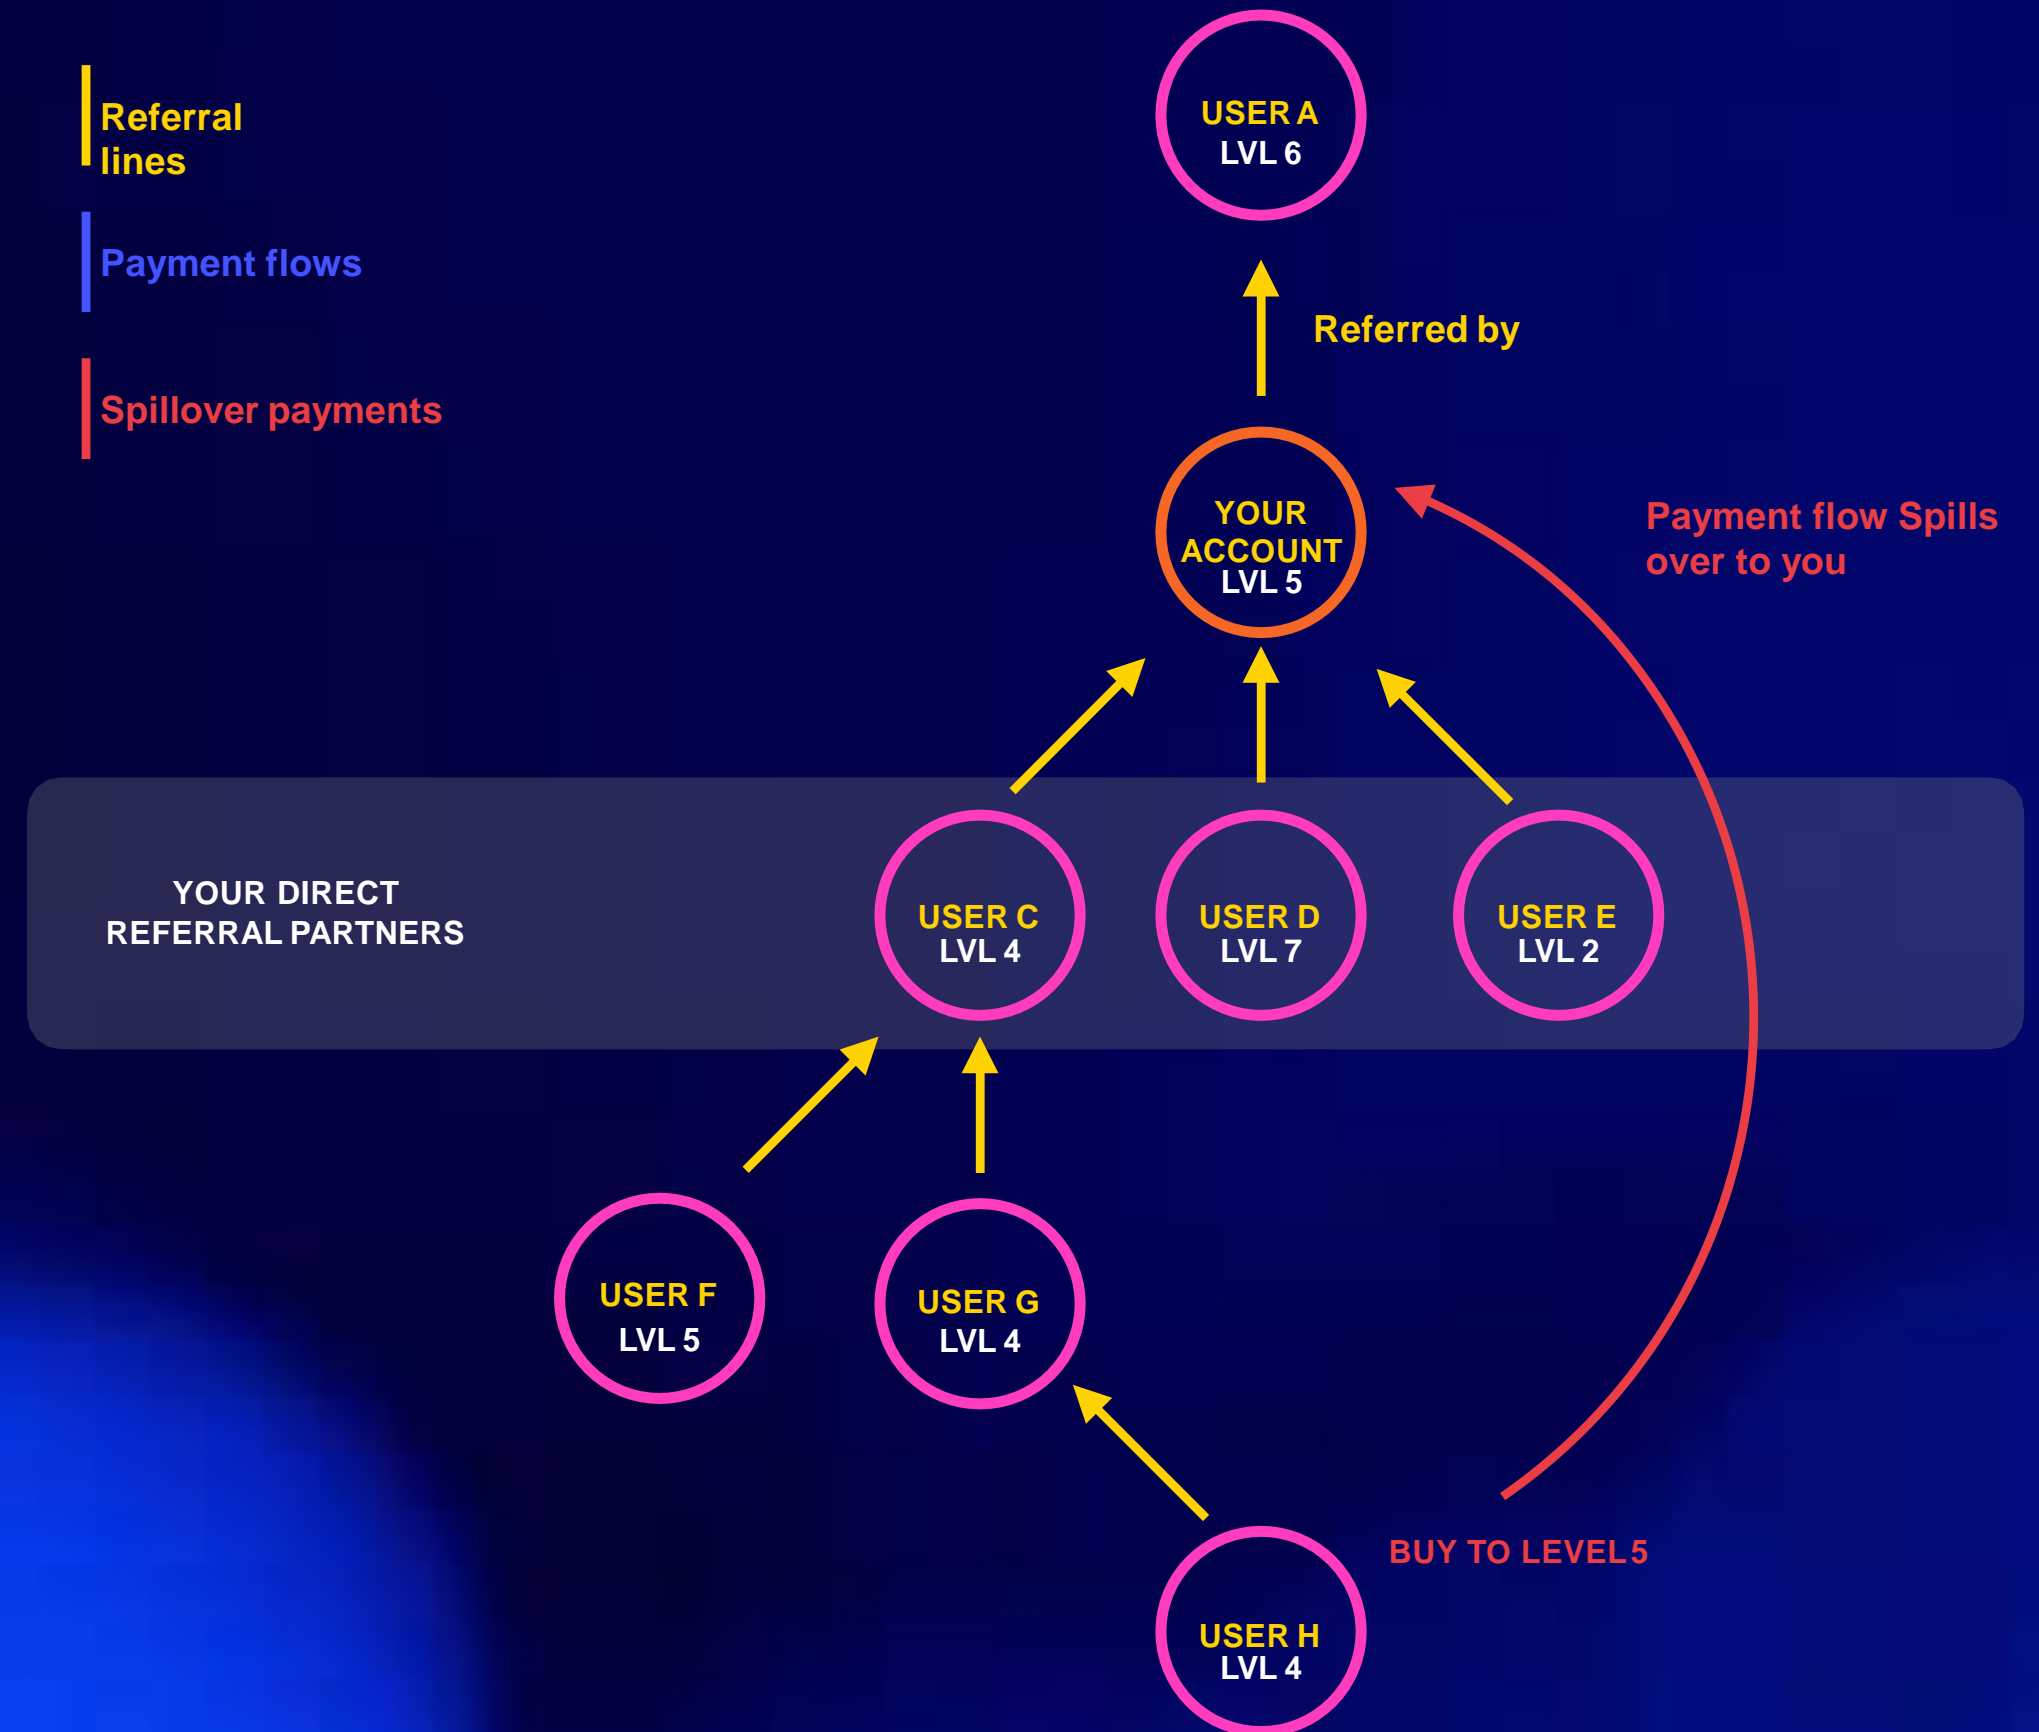

- ❖ **Spillover Payments** are payments that you receive for users that are not directly invited/referred by you - they are in effect bonus payments.
- ❖ The first type of Spillover payment available in the Level Renewal payments.
- ❖ When a Partner fills all of their slots (All 3 in X1 and all final 4 in X2) - the final slot is the auto-renewal payment.
- ❖ The payment for this slot pays for the level to be renewed, to do this the payment goes up-line to the users referrer (User A in the first example).
- ❖ For you to earn these Spillover Payments you need your Partners to fill their slots.
- ❖ For X1 that gives you 3 Spillover payments for each cycle! For X2 you can earn 4 Spillover payments for each cycle.
- ❖ There is another type of also available in the Matrix, we'll cover this next.

Level Upgrade Spillovers

Level Upgrade Spillovers

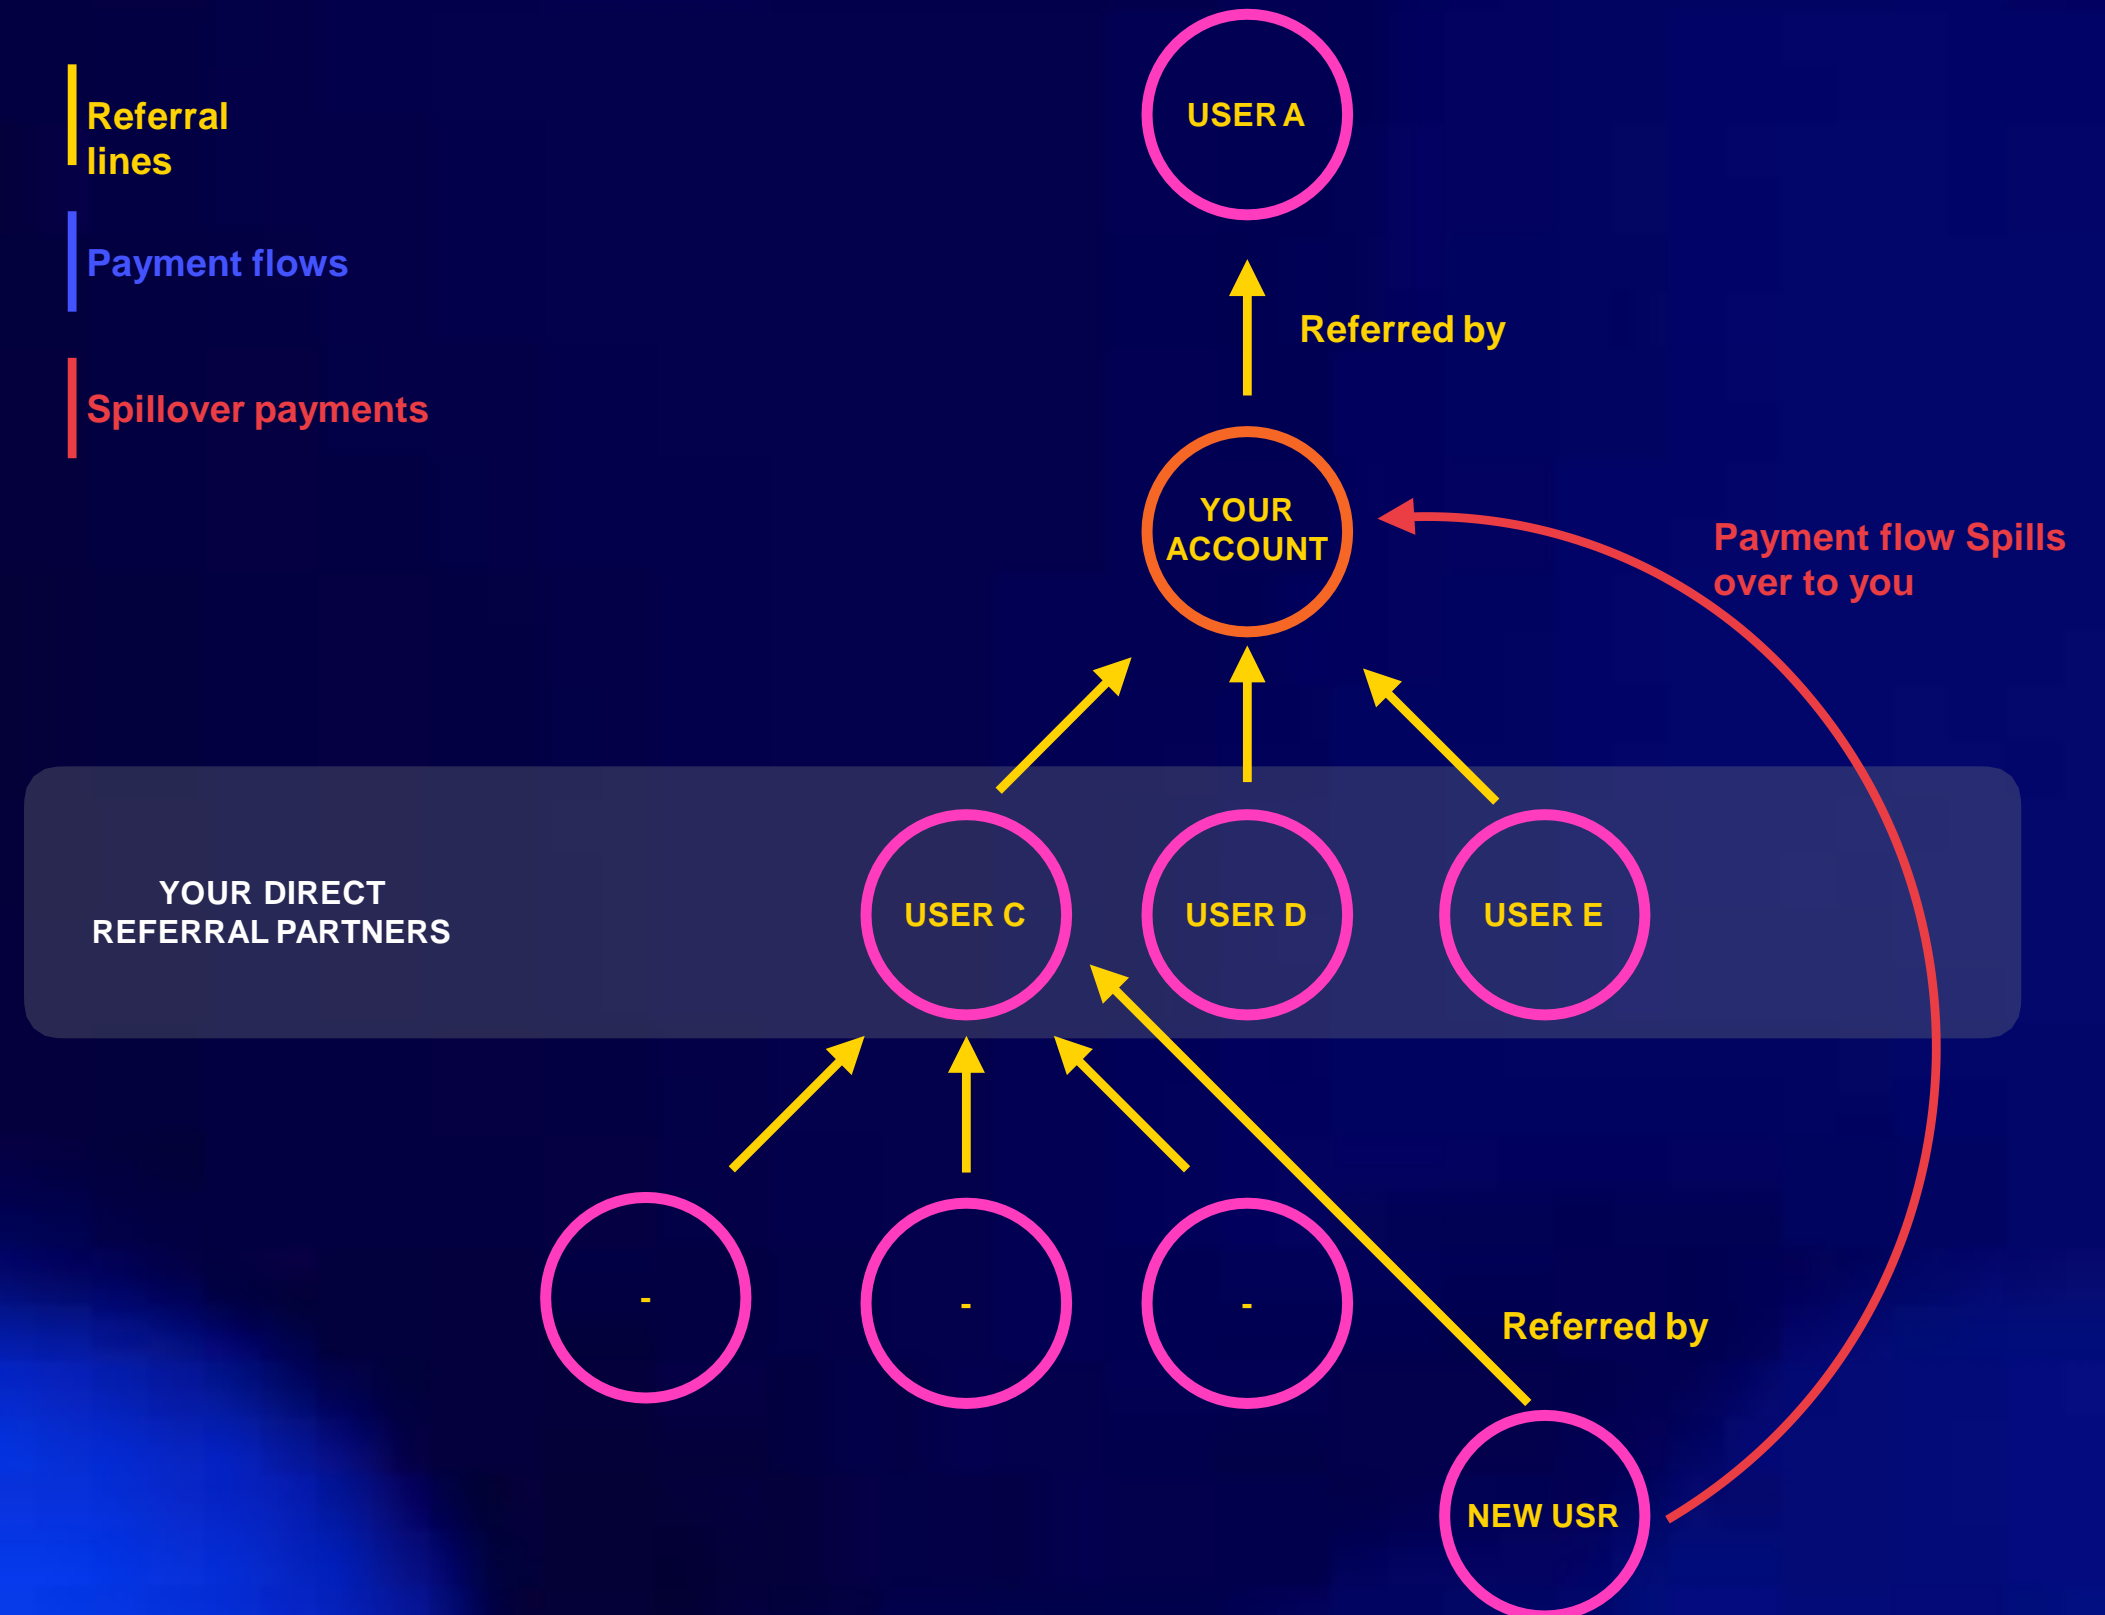

- ❖ Spillover Payments are payments that you receive for users that are not directly invited/referred by you - they are in effect bonus payments.
- ❖ The second type of Spillovers for is for Level Upgrades.
- ❖ If a Partner (Or even a Partner of a Partner of a Partner of a Partner) in your Matrix upgrades/buys the next level and their parent IS NOT at that level then the system has to “Spill” that payment up the Matrix until it finds a player with the correct level.
- ❖ In the example to the left - USER H is buying an upgrade to LEVEL 5.
- ❖ His Parent (USER G) is currently at LEVEL 4 so is not eligible for this payment, so the system starts scanning the matrix.
- ❖ First check: Check USER G parent (USER C) = not eligible.
- ❖ Second check: Check USER C parent (YOUR ACCOUNT) = eligible.
- ❖ So the payment for the upgrade would spill all the way up to you. (At this point USER H becomes a partner of you too jumping up the MATRIX from USER G - getting more spills).

Level Block Spillovers

Level Block Spillovers

- ❖ **Spillover Payments** are payments that you receive for users that are not directly invited/referred by you - they are in effect bonus payments.
- ❖ The third type of Spillover payment available in the Matrix is **Level Block Spillovers**.
- ❖ When one of your Partners has filled all of their slots in the current level - their Referrals slots are reset ready for another cycle.
- ❖ But - to enable this new cycle they must also be upgraded to the next level. If not this current level will be blocked for them and the next Partner they get will be redirected to you.
- ❖ The system searches up the Matrix of **USER C**, checking the Current Referrer to see if that user is valid (**YOUR ACCOUNT**)... if you were also in the **BLOCKED** state for this level it would continue searching up the Matrix (**USER A**).

X-1 Upgrading Levels

Tronaxe Matrix - Upgrading Levels

❖ There are 20 levels in both Tronaxe Matrix X1 & X2 - each level priced at twice the previous (Level 1 = 0.4 TX). You can only buy each level in sequence (And independently for each X1 and X2).

❖ If you level up ahead of your partner then you will move ahead of them in the Matrix. Your link will temporarily move to another player (If your original partner does upgrade when you next renew they get the chance to regain you as a partner).

❖ There is also a RISK of you losing out on profit if you are not at the highest level of your partners when they level up - as you can only receive their payment if you match their level at the time, so it pays to always be ahead of your partners.

❖ Upgrading through the levels also entitles you to receive multiple rounds of payments for the previous level.

X-2 Upgrading Levels

Tronaxe Matrix - Upgrading Levels

❖ There are 20 levels in both Tronaxe Matrix X1 & X2 - each level priced at twice the previous (Level 1 = 0.4 TX). You can only buy each level in sequence (And independently for each X1 and X2).

❖ If you level up ahead of your partner then you will move ahead of them in the Matrix. Your link will temporarily move to another player (If your original partner does upgrade when you next renew they get the chance to regain you as a partner).

❖ There is also a RISK of you losing out on profit if you are not at the highest level of your partners when they level up - as you can only receive their payment if you match their level at the time, so it pays to always be ahead of your partners.

❖ Upgrading through the levels also entitles you to receive multiple rounds of payments for the previous level.

X-1 Level Income

Tronaxe Matrix – X-1 Level Income

Users will get Level Income till 20 Level from every slot which he buy.

Slots	Level	Income	Slots	Level	Income
Slot 1	Level 1 to 20	0.01	Slot 11	Level 1 to 20	5.50
Slot 2	Level 1 to 20	0.02	Slot 20	Level 1 to 20	6.00
Slot 3	Level 1 to 20	0.04	Slot 13	Level 1 to 20	6.50
Slot 4	Level 1 to 20	0.08	Slot 14	Level 1 to 20	7.00

Tronaxe Matrix Vs Forsage

Tronaxe Matrix

Tronaxe Matrix is an evolution of the concept of Ethereum Forsage - our Matrix code, including the Spillover algorithm functions exactly as Forsage so you can duplicate your strategies from Forsage and use them within Tronaxe Matrix.

What is unique about Tronaxe Matrix is the Ease of Use and earn lifetime Income. The other great benefit of Tronaxe Matrix over Forsage is the incredibly low transaction costs that come with the Tronaxe Network.

**The Fastest, Easiest and Risk-Free
Way to Multiply your Tronaxe - TX “Infinitely”**
